

Weather & Traffic on XM is immediately available to me when I need it. With normal radio I have to wait 10-20 mins to hear the traffic report I want. I urge the board to continue to let XM broadcast this traffic and weather information. If we want to pay to receive XM radio then the subscribers should have the freedom to chose what we want to hear and not be stifled by big-pocket radio companies. Thank you for letting me voice my opinion.
